How it works. ECC is accomplished by adding redundancy to the transmitted information using an algorithm. A redundant bit may be a complex function of many original information bits. The original information may or may not appear literally in the encoded output; codes that include the unmodified input in the output are systematic, while those that do not are non-systematic.

### **Error correction code - Wikipedia**

The Shannon–Hartley theorem says that the limit of reliable information rate (data rate exclusive of error-correcting codes) of a channel depends on bandwidth and signal-to-noise ratio according to:  $C = B \log_2(1 + \frac{S}{N})$  where  $C$  is the information rate in bits per second excluding error-correcting codes;  $B$  is the bandwidth of the channel in hertz;  $S$  is the total signal power (equivalent to the carrier ...

We set our own Everyday Low Prices as well as sale prices, but some manufacturers restrict how retailers display that pricing. In these cases manufacturers require that you take some steps to add the item to your cart or go to checkout to view our final prices when lower than the manufacturer's set minimum advertised pricing.

As a follow-up to Tuesdayâ€™s post about the majority-minority public schools in Oslo, the following brief account reports the latest statistics on the cultural enrichment of schools in Austria. Vienna is the most fully enriched location, and seems to be in roughly the same situation as Oslo. Many thanks to Hermes for the translation from Unzensuriert.at:
